

Flexible Abrasives - Polishing discs

★★★
PREMIUM

PREMIUM conditioning discs SCF

for steel, stainless steel and nonferrous metals

Application

- + For removing the final scratches in preparation for polishing

Advantage

- + No discolouration thanks to low thermal load (heat build-up)
- + Specially developed to achieve the best results even on non-adjustable angle grinders
- + Three-dimensional flap design eliminates clogging of the disc

Form	Type number	Dimension	Specification	Max RPM	PU
